## ■ How to register S/W Serial Number and S/W Activation Key

Via the internet or other different methods, it is required to register the S/W Serial Number and S/W Activation key which can be found on the bottom of each unit. After completing the registration process and if you want to change the Host PC (or the hard drive within the original Host PC), the registered S/W Serial number and S/W Activation key should be unregistered.

If the S/W Serial number and S/W Activation key are not unregistered and if you register these numbers onto another Host PC, you can only use those S/W Serial number and S/W Activation key only 3 times repeatedly.

For more details, refer to page 2-29 of the User's Manual.

S/W Serial No.	S/W Activation Key
1200000	654321 492481 213259

## ■ Supporting Monitor Resolution

This product supports 640x480, 800x600, 1024x768 and 1280x1024 resolution modes. SXGA (1280x1024) mode runs at 63Hz only so please check your monitor's capability to display. If your monitor does not support 63Hz mode, then please use XGA (1024x768) mode instead.
